OEIS VISION AND MEMBERSHIP BENEFITS

OEIS aims to Enhance, Develop, Promote, Support, Foster, Provide and Advocate on behalf of cardiologists, vascular surgeons, interventional radiologists, and other specialists involved in office based endovascular or interventional procedures. Allied health members, related industry representatives and service organizations are also welcome.

- **Enhance** the safety, quality, and patient satisfaction of outpatient endovascular and interventional procedures.
- **Develop** standards of practice for the operation of outpatient endovascular and interventional cases.
- **Promote** education regarding outpatient endovascular procedures among the medical community and the public.
- **Support** research on medical, financial and management issues of endovascular centers.
- **Foster** collaboration and unity among multiple specialties, industry and service partners to advance this healthcare delivery model.
- **Provide** a forum to share experiences and best practices among practitioners
 - Provide leadership on how this new, innovative healthcare delivery model integrates into our rapidly evolving healthcare system.
 - Provide a method to examine the financial impact of outpatient endovascular and interventional centers on overall medical expense and practice.
- **Advocate** for outpatient endovascular and interventional centers with governmental bodies, insurance companies and industry in collaboration with the CardioVascular Coalition.
 - Advocate for its members as well as for access to care and improved patient satisfaction and outcomes in outpatient endovascular and interventional settings.

MEMBERSHIP TYPES AND DUES

Membership Type	Annual Dues
Active Membership There are three pathways for Active Membership. Pathway One will be considered for physicians who perform procedures in outpatient endovascular or interventional fluoroscopic suites. Pathway Two will be considered for physicians who belong to practices which offer outpatient endovascular or interventional procedures and have at least one interventionalist in their practice who is an active OEIS member. Pathway Three will be considered for physicians who do not clearly meet the preceding criteria for Pathways One and Two will be reviewed for membership on a case-by-case basis.	\$350
Associate Membership Associate Membership will be considered for physicians who are interested in outpatient endovascular and interventional procedures, but who do not currently perform such procedures, belong to practices which offer such procedures or meet qualifications of Active Membership. Associate membership will also be considered for non-physician individuals who are employed or affiliated with corporations involved in providing outpatient endovascular and interventional procedures, or in providing goods and services for office-based cardiovascular procedures.	\$350
Corporate Membership Corporations who provide goods or services for outpatient endovascular or interventional centers.	\$3,000
